

# Key Priorities: Sharing Data Across Sectors for Health

**Survey Respondents** are planning to or are currently sharing data across sectors

**Survey Respondents** are at least somewhat experienced in leading community health improvement initiatives

## Top 5 Priority Areas for Advancing Data Sharing

1. Building and sustaining effective partner collaborations
2. Mapping community resources, needs, and health risks
3. Data collection, validation, and integration
4. Selecting measures and evaluating impact
5. Data reporting and visualization

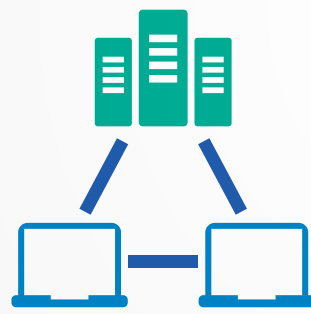

## Areas of Interest for Future Learning Collaborative Activities

### Social & built environment

(food security, housing)

### Data infrastructure

(EMR data sharing, HIE, claims data)

### Data viz & mapping

(ArcGIS, Tableau)

### Sharing data with specific sectors

(Behavioral health, social services)

## Learning Collaborative Activities of Interest

1. Video meetings

2. Peer-to-peer consultation

3. Online virtual collaboration platform

4. In-person national meeting/convention

5. Subject matter expert consultation
